Unborn children sentenced to death
do not receive any anaesthetics.

Abortion is the destruction of human life during the period between conception and birth, thus even of 9 month-old children. For instance, in the USA, the killing of even nine-month-old, healthy unborn babies was “legalized,” and in Russia and Great Britain - of six- and seven-month-olds. The lives of these children are taken in such a cruel way, with no anaesthetics whatsoever.
